

Get to work with Amaryllis!

You can turn your shopfront into a stylish attention-grabber in 3 simple steps.
And of course you can also use it to create a star window at home!

Step 1

Stick the template on the **outside** of the window with adhesive tape. Make sure that the sheet is nice and tight on the glass.

Tip: masking tape or washi tape are easy to remove.

Step 2

Make sure that the window is clean and dry on the **inside**.

Trace the design on the **inside** of the window with a white pen suitable for glass, such as a paint marker or chalk marker.

Step 3

Check that you've copied all the lines, and allow your drawing to dry. Remove the template from the outside, and enjoy the finished product!

Tip: the pens are available in many different colours, so you could also make your amaryllis pink or red!

Hotter than winter

Come inside! The stars are waiting for you
